There seems to be a strong current among labor organizations toward Harrison and Morton.

The democratic legislative ticket in this county should be withdrawn. It is ridiculous for it to stand.

The GAZETTE Printing company yesterday concluded negotiations for the control of Bronson's patent for making blank books, for the state of Colorado and the territories of Utah, Wyoming and New Mexico. The best blank book firms throughout the country are purchasing the right to control this patent in their own cities and states. The books made by this patent will open flat from the first to the last page and are stronger, more flexible and more durable on account of the sewing and binding than books sewed and bound by any other process. As is well known, a source of [illegible] old method is in the sewing. A single thread breaking or a stitch losing its hold, will cause entire sections to come out, necessitating rebinding of the book and causing loss of time and much inconvenience. By this new method a thread may be cut through—an entire section and not a leaf will be disturbed. In making blank books the lowest cost sewed to narrow strips of parchment. By this new process should the parchment break, the book will remain unhinged. The cover is perfectly flat from first to last page as a piece of sprung put in the back of the book. This not only makes the book open perfectly flat but makes it much stronger. Whatever strain there is on the book when open is placed entirely upon the cover. The leather joints are prevented by these springs from ever getting apart and the cover is preserved from flattening when opened. There is no other patent which will secure the "The book is specially adapted for commercial houses, banks, county offices and railroads. The first book by this patent is just completed and we shall be glad to show it to any of our customers.

The committee which Mr Hinch appointed to make arrangements for the complimentary banquet to be given to the officials of the Rock Island on the completion of that road has held meetings and arrangements are now being perfected. The date cannot be announced as it is desirable to have the banquet given at a time when it will be convenient for the holding of cards of the railroad to be present. It will [illegible] Leadville Pueblo on the arrival of the Manitou Pikes and Colorado Springs and Arkansas on the arrival of the Denver guests will meet the Colorado Midland guests at Colorado Springs at which the leading people of the state were invited. It is desired that our celebration should be one well behind those of Pueblo, Colorado Springs and Aspen. The committee of which Mr Hinch is chairman will be in direct correspondence with the committees of the cities before mentioned. It is an opportunity which we should not fail to improve to impress the people of this state that Colorado Springs has now every advantage in railroad connections both east and west and north and south that is possessed by any other city in Colorado. We have now three railroads running north and south through the city one [illegible] coming from the south to the mountains and we soon will have a direct connection with Chicago. Every point in this state is reached now more easily from this city than from any other point in the state because this city is located nearly in the center of the state and every point on the system has a connection with it. Up to this time we have made very little demonstration of our future possibilities and it is time that we should impress upon the people of the state. Our people should endeavor to [illegible] the people of the state. Our people should endeavor to [illegible] connection.

The republican party is the only party that can successfully and equitably [illegible] republican platform of 1884 stood upon the tariff. A party that will not [illegible] will not [illegible] can not [illegible] of a great state [illegible] is most significantly clear and definite.
